*Per capita income or income per person is income divided by population in a given geographic area, in monetary terms.

**Household income is the sum of money income received in the calendar year by all household members 15 years old and over, including household members not related to the householder, people living alone, and other nonfamily household members. Median household income divides households into two equal segments with the first half of households earning less than the median household income and the other half earning more, and is used to provide information about the relative wealth of a geographic area.
