

Upcoming section meeting:

**The American Society for Engineering Education (ASEE)
2008 Gulf-Southwest (GSW) Annual Conference
March 26-28, 2008
Hosted by the University of New Mexico (UNM)**

“Current and Future Challenges and Opportunities in Engineering Education”

The University of New Mexico invites your participation in the upcoming 2008 ASEE-GSW Conference being held in the city of Albuquerque, New Mexico, from March 26-28, 2008.

A workshop prior to the conference start is planned for Wednesday. That will be followed by one and a half days (Thursday morning till noon Friday) of exciting conference presentations by faculty, staff, students and others interested in engineering education. Food will be served as part of the registration fee. Best Paper competitions and Awards, and Best Student Paper Awards, will be conducted at the conference. Other awards for teaching, service and the most-traveled award will also be handed out.

The conference solicits a wide scope of topics related to engineering education. Some of the topics of interest (although certainly not a exclusive list) are:

- Service Learning
- Ethics in Engineering Education
- Teaching and Learning about New Technologies
- The Innovative Use of Technology in the Classroom
- Distance Learning and Education
- Minority and Gender Issues in Engineering
- Engineering Programs Accreditation
- Global Engineering
- Curriculum Innovations
- Student Recruitment and Retention
- Links to K-12 Education
- Other Engineering Education Topics

Come and join us in Albuquerque, Duke City and one of America's top-10 cities, and in New Mexico, the Land of Enchantment, for an invigorating time dealing with engineering education issues and exploring the great Southwest and all what it has to offer!
