

# **School of Medicine Biomedical Sciences MD-PhD**

---

## **Broad Learning Goals**

- A. The goal of the MD/PhD program is to develop physician-scientists with clinical and scientific research skills that will allow them to study fundamental questions pertaining to the processes related to human diseases.

## **Student Learning Outcomes**

1. We will determine the percentage of graduates that pursue a career in biomedical research vs. private practice after completing their residency training.
2. We will also track the ability of the graduates that pursue research careers to secure extramural funding to support their research programs.
