

College of Nursing
Master of Science in Nursing, Post Masters Certificate
(NURCP)

Broad Learning Goals

- A. Prepare nurses with the skills necessary for leadership in advanced practice in patient/client care, education, or administration.

Student Learning Outcomes

- A1. Students will be able to utilize advanced clinical knowledge and skill to promote, maintain, and/or restore optimum wellness to client systems.
- A2. Students will synthesize knowledge from the biophysical, social, and nursing sciences which affects health/illness behavior or client systems as a basis for nursing practice, education, and administration.
