## Research Experience

### Master's paper

**thesis:** An Experimental Study of Social Skill Training of Children based on Short-term Group Play Therapy

**Research Content:** The study attempted to bring in short-term group play therapy, especially solve the problem of children's emotional social skill shortage. At the same time, the study wants to compare directive group play therapy with non-directive group play therapy. Based on these two therapies, it designed two different blue prints of group training, and it took 2 month's to enhance the children of emotional social skill.

**Advisor:** Prof . Cao Zhongping, the director of developmental and educational research center of Hunan Normal University, the director of Preschool Education faculty, the adjunct professor of Hunan First Normal College, the member of China National Society of Early Childhood Education.
