Education

- M.E. Psychology, Southwest University, Chongqing, P. R. China, 2005-2008.
- B.S., Biology, Fudan University, Shanghai, P. R. China, 2000-2004.

Research Experience

- **Pain Perception**

My researches of M. E. period mainly focused on pain perception. I took part in series of experiments investigating factors influencing pain tolerance and pain intensity using the Cold Pressor Task. In addition, I finished a review of Placebo Effect, half the volume of which was about neurological mechanisms of expectation-induced placebo effect in pain. Finally, the title of my Master's Thesis was "An investigation of paradigms and methods of time estimation during Cold Pressor immersion".

- **Temporal Cognition**

I took part in some temporal cognition studies, including behavior experiments and ERP experiments, for my research advisor, Professor Xiting Huang, was China's leading authority on temporal cognition, and many of my colleagues were working in this area.
