

Unit: Respiration

Name: Wonderful P. Student

Muscle name	Attachments (Origin, Insertion)	Action During Contraction	Function	Picture
Diaphragm	Central tendon	Moves downward into abdomen	Main muscle of inspiration (increases volume of chest cavity)	Draw a picture of the muscle and its attachments (doesn't have to be great art)
Transverse thoracic muscles	Lower third of inner sternum to second through sixth costal cartilages	Depress upper ribs	Muscle of forced expiration (decreases volume of chest cavity)	
Oh boy, there are lots more muscles in this system....
