

Isometric Homework

1. For the objects on page 1, draw an isometric of each of the four objects shown. You must make the drawings on your own paper. If you are using grid paper downloaded from the web, place the grid on the back of the sheet.
2. For the objects on page 2, draw the third view of the multi-view drawing then draw an isometric of the object. You may draw the third view on the assignment sheet. The isometric view must be drawn on your own paper.
