

# How to know about your Operating System

Select my computer then right-click the selected icon

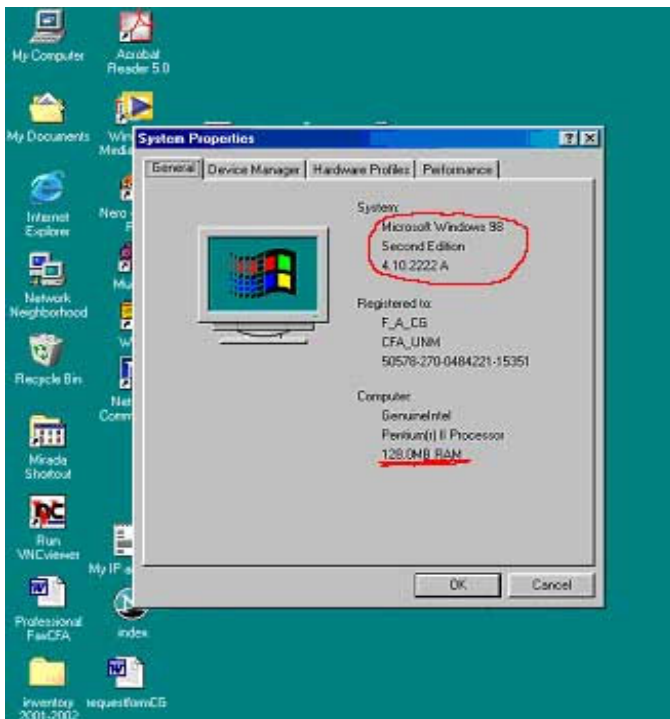

A window like down below will appear  
At that time, select "Properties".

If you are running under Windows 98 Operating System, you will see that:  
In the circle, you now can know what is your operating system:

- Microsoft Windows 98 Second Edition.

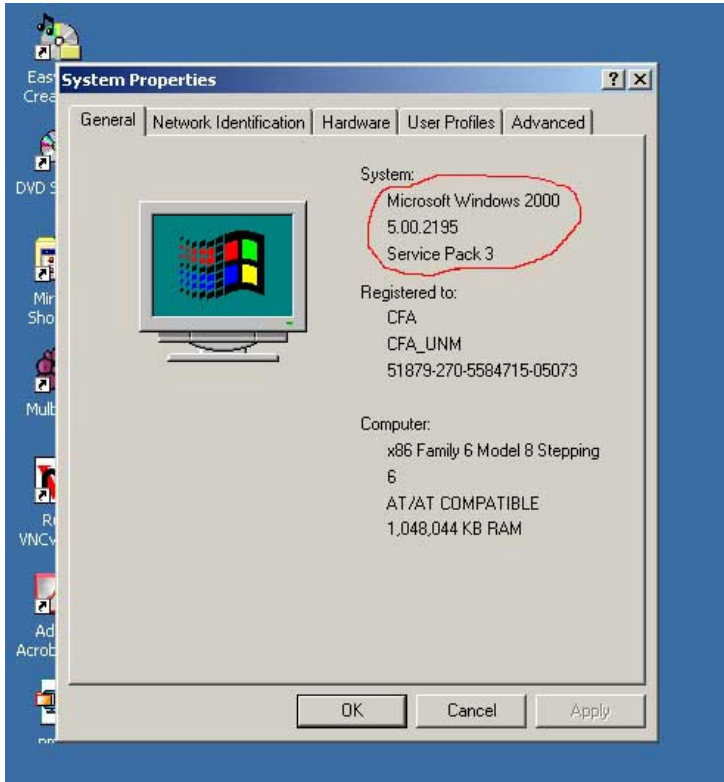

Underlined is the amount of physical memory installed:

If you are running under Windows 2000 Operating System, you will see that:  
In the circle, you now can know what is your operating system:

- Microsoft Windows 2000.

Please check if you have the most current Service Pack. At the date of January 2003, the current service pack is “Service Pack 3”. Please do all the **critical updates** on you machines.

### **N.B.**

The two most popular Operating Systems in the college are:

- Windows 2000 (recommended)
- Windows 98 Second Edition (OK for slow computer)

You might, depending of your operating system, have also:

- Microsoft Millennium (not supported by UNM)
- Microsoft XP Home Edition (not recommended)
- Microsoft XP Professional Edition (recommended)
