Overview

This codebook refers to variables in two data sets, MIDA and MIDB. MIDA contains the essential attributes of each militarized interstate dispute from 1/1/1816 through 12/31/2010. MIDB describes the participants in each of those disputes.

The variables and their coding rules are generally discussed in Daniel M. Jones, Stuart A. Bremer, and J. David Singer, "Militarized Disputes, 1816-1992: Rationale Coding Rules and Empirical Patterns". *Conflict Management and Peace Science*, Vol. 15, 1996.

File Format

The files are distributed as comma-separated value (CSV) format, that is, text files in which the data fields separated by commas, with text enclosed in quotes. The first record contains field names in quotes. On most Microsoft Windows systems, this file format will open up by default in Microsoft Excel. The files may also be easily read in programs like Stata; in Stata the typical command to read the files would be:

   insheet using "MIDA_4.0.csv"
