

Table of Contents

Preface	v
List of Recipes (Algorithms and Heuristics)	xi
PART I. MATHEMATICS	1
Chapter 1. The Game	3
1.1 Systematic Problem Solving	3
1.2 Artificial Intelligence and the Algorithmic Approach	5
1.3 Science and Algorithms	6
1.4 How to Develop an Algorithm	7
Chapter Summary	9
Exercises	10
Chapter 2. Unit Conversions	11
2.1 Units of Measure	11
2.2 Metric Units	11
2.3 Unit Conversions	12
2.4 Unit Conversion Factors	14
2.5 Sets of Units	16
2.6 The Itinerary	17
2.7 Multidimensional Maps	19
2.8 Conversions and Formulas	20
2.9 Conversion Tables	22
Chapter Summary	23
Exercises	24
Chapter 3. Mathematical Tools	25

3.1 The Queen of the Sciences	25
3.2 Symbolism	25
3.3 Functions and Graphs	26
3.4 Curve Fitting	31
3.5 Solving Equations	33
3.6 Solving Linear Equations for One Variable	34
3.7 Solving Quadratic Equations for One Variable	35
3.8 Solving General Equations for One Variable	35
3.9 Solving Systems of Linear Equations for Several Variables	38
3.10 Geometry	40
3.11 Calculus	42
3.12 Computer Mathematics	43
Chapter Summary	47
Exercises	49
Chapter 4. Models	51
4.1 Reductionism	51
4.2 Physical Models	51
4.3 Mathematical Models	52
4.4 Wave Models	54
4.5 Matter Models	56
4.6 Reality	57
Chapter Summary	57
Exercises	58
PART II. PHYSICS	59
Chapter 5. Mechanics	61
5.1 Introduction	61

5.2 Particle Mechanics	61
5.3 Energy	65
5.4 N-Body Mechanics	70
5.5 Field Mechanics	71
5.6 Relativistic Mechanics	73
5.7 Quantum Mechanics	75
5.8 Wave Mechanics	76
5.9 QED, etc	77
Chapter Summary	78
Exercises	79
PART III. ATOMS	81
Chapter 6. Chemical Elements	83
6.1 Chemical Principles	83
6.2 Chemical Matter	84
6.3 Atomic Theory	85
6.4 Chemical Moles	86
6.5 The Atomic Mol Map	87
Chapter Summary	89
Exercises	90
Chapter 7. Atomic Structure	91
7.1 Cosmology	91
7.2 Subatomic Particles	91
7.3 Element Symbols	93
7.4 Atomic Spectra	95
7.5 Wave Mechanics	100
7.6 Electronic Configurations	102

Chapter Summary	105
<i>Appendix: The Bohr Atom Model</i>	106
Exercises	107
Chapter 8. The Periodic Table	109
8.1 Chemical Families	109
8.2 Family Relationships	109
8.3 Periodic Configurations	111
8.4 Periodic Trends	113
Chapter Summary	116
Exercises	117
PART IV. MOLECULES	119
Chapter 9. Chemical Formulas	121
9.1 Molecular Formulas	121
9.2 Molecular Mass	121
9.3 Chemical Analysis	122
9.4 Empirical Formulas	122
9.5 True Molecular Formulas	123
9.6 The Molecular Mol Map	124
9.7 An Extended Molecular Mol Map	126
Chapter Summary	128
Exercises	129
Chapter 10. Chemical Nomenclature	131
10.1 Chemical Language	131
10.2 Common Names	131
10.3 Systematic Chemical Nomenclature	131
10.4 Naming Inorganic Compounds	132

10.5 Naming Organic Compounds	135
10.6 Naming Coordination Complexes	137
Chapter Summary	138
Exercises	139
Chapter 11. Chemical Equations	141
11.1 Chemical Equation Concepts	141
11.2 Balanced Chemical Equations	141
11.3 Chemical Stoichiometry	145
11.4 Volume Stoichiometry	148
Chapter Summary	152
Exercises	153
Chapter 12. Chemical Bonding	155
12.1 Chemical Bonds	155
12.2 Ionic and Covalent Bonds	155
12.3 Molecular Mass Spectrometry	157
12.4 The Electronic Theory of Chemical Bonding	159
12.5 Lewis Structures	161
12.6 Molecular Geometry	165
12.7 Molecular Polarity	167
12.8 Molecular Wave Mechanics	168
12.9 Valence Bond Theory	169
12.10 Molecular Orbital Bond Theory	171
12.11 Bond Strength	174
12.12 Molecular Motion	184
12.13 Molecular Spectroscopy	185
Chapter Summary	188

Exercises	189
PART V. ENSEMBLES	191
Chapter 13. Thermodynamics	193
13.1 Heat	193
13.2 The First Law	193
13.3 The Kinetic Molecular Theory	195
13.4 Enthalpy	196
13.5 Heat and Stoichiometry	199
13.6 Reaction Heat from Heats of Formation	200
13.7 Reaction Heat from Bond Energies	201
13.8 The Second Law	202
13.9 Boltzmann Distributions	203
13.10 Chemical Thermodynamics	205
13.11 Statistical Thermodynamics	207
Chapter Summary	213
Exercises	215
Chapter 14. Intermolecular Bonding	217
14.1 Phases	217
14.2 Kinetic versus Potential Energy	217
14.3 Classes of Intermolecular Bonds	218
14.4 Kinetic Molecular Energy	220
14.5 Intermolecular Bonding vs Temperature	221
14.6 Vaporization	222
14.7 Phase Heuristic	224
14.8 Liquids	226
14.9 Heat Capacity	226

Chapter Summary	226
Exercises	227
Chapter 15. Gases	229
15.1 The Gaseous Phase	229
15.2 Gas Laws	229
15.3 The Ideal Gas Law	230
15.4 Using the Ideal Gas Law	232
15.5 Mixtures of Ideal Gases	234
15.6 Gas Velocity	235
15.7 Real Gases	236
Chapter Summary	238
Exercises	239
Chapter 16. Solids	241
16.1 Crystal Lattices	241
16.2 Lattice Energy	243
Chapter Summary	246
Exercises	247
Chapter 17. Solutions	249
17.1 Molecular Mixtures	249
17.2 Concentrations Units	249
17.3 Concentrations as Conversion Factors	250
17.4 Solubility	250
Chapter Summary	251
Exercises	252
PART VI. DYNAMICS	253
Chapter 18. Chemical Kinetics	255

18.1 The Kinetic-Molecular Paradox	255
18.2 The Collision Rate Model	255
18.3 Rate Laws	257
18.4 Reaction Mechanisms	257
18.5 Empirical Rate Laws	260
18.6 Temperature Dependence of Rates	265
Chapter Summary	267
Exercises	268
Chapter 19. Chemical Equilibria	269
19.1 Dynamic Equilibrium	269
19.2 General Mass Action	271
19.2 Mass Action Calculations	273
19.3 Solubility Equilibria	275
19.4 Acid Base Equilibria	276
19.5 Acid Base Titrations	281
19.6 Oxidation Reduction Equilibria	285
Chapter Summary	290
Exercises	291
Solutions to Exercises	293
Glossary	313
