GA/TA/SCHOLARSHIP APPLICATION FORMS
PLEASE READ BEFORE FILLING OUT INFORMATION

A teaching assistant may be assigned to teach activity classes in the Physical Education Activity Program, activity and content courses in the Physical Education Teacher Education program, or content courses in Health Education. A graduate assistant works in the Exercise Physiology Laboratories or in the Athletic Training Education program. The primary responsibility of the GA is to perform fitness testing on students in the Physical Education Activity Program. The Hickman Assistantship provides assistance to the Sport Administration faculty. The Diehm Scholarship carries no work responsibilities. You must carefully read all parts and pages of the application and fill out all of the appropriate information for the type of assistantship for which you are applying. Keep in mind that the more information you can provide about your experience, interests, and abilities, the better able we will be to judge your application against the many others we receive.

You must be admitted to the Graduate School in order to be appointed as a graduate assistant or teaching assistant. Therefore, at the same time you submit this application you should submit your application for admission to Graduate School. Unfortunately, the process of admission followed at the Graduate School often takes longer than departments can wait to learn about applicants' admissibility. Your application for an assistantship will not be processed unless or until we can determine that you will be admitted to the Graduate School.

Please try to have your application and all reporting materials in by March 1 for best consideration.
