## Professional Goals Statement

For years, I have been working as a consultant, or as a member of organizations, to promote an understanding and awareness of cultural differences and similarities. This has taken the form of helping diverse teams learn to work effectively together, leading community dialogues, mentoring young leaders, and advocating the benefits of an inclusive society.

I work in corporations, non-profit organizations and government agencies. I work with HR professionals, teachers, students, community leaders, and artists. I have a role to play in making the vision of an inclusive, welcoming world, a reality.

For myself and for generations to come, I recognize that our ability to create this kind of society is critical to our human survival, and is not something any of us can accomplish alone.

I am an agent of innovative organizational transformation!
