

Designing Knowledge Management Solutions (OLIT 507)

UNM's Organizational Learning & Instructional Technology Program

Offers an **Online Course in Fall 2008**

This is a course on the application of general principles and techniques for designing technology supported knowledge management solutions. After taking this course, students will be able to design, develop, and deliver interventions to support the creation, preservation, and dissemination of knowledge in organizations. The course is a combination of individual and collaborative work that has students put "theory into practice" by completing exercises and a course project. Students will use Microsoft's Windows SharePoint Services to demonstrate the role of information technology in supporting a knowledge management solution.

Instructor: Mark Salisbury, Ph.D.

E-mail: salisbu@unm.edu

Take this course as an elective, as part of the OLIT iLearning and the Leadership for Innovation in the New Economy Professional Development Certificate Programs, or to complete the requirements of the OLIT Master's Program.
