

Knowledge Dissemination and Application (OLIT 511)

UNM's Organizational Learning & Instructional Technology Program

Offers an **Online Course in Fall 2008**

This is a course on the general principles and techniques for designing technology supported solutions for organizational knowledge dissemination and application. It is a combination of individual and collaborative work that has students put "theory into practice" by completing exercises and a course project. Students will use Microsoft's Windows SharePoint Services to demonstrate the role of information technology in supporting organizational knowledge dissemination and application. Students will also apply a "Reusable Learning Objects" methodology for capturing, storing, and retrieving best practices and expert advice for the course project.

Instructor: Mark Salisbury, Ph.D.

E-mail: salisbu@unm.edu

Take this course as an elective, as part of the OLIT iLearning Professional Development Certificate Program, or to complete the requirements of the OLIT Master's Program.
