Minimum pore size obtainable in a silica gel during drying
Wallace, S; Brinker, CJ; Smith, DM

Use of polymeric silica sols in inorganic molecular sieving membranes
Sehgal, R; Huling, JC; Brinker, CJ
Proceedings of ICIM3; 1995

Ambient-pressure silica aerogel films
Prakash, SS; Brinker, CJ; Hurd, AJ; Rao, SM

Ultramicroporous zirconium silicate supported membranes for gas separation
Mendez-Vivar, J; Brinker, CJ
Proceedings of ICIM3; p.557; 1995

Percolation model for selective dissolution of multi-component glasses
Kale, RP; Brinker, CJ
Materials Research Society Symposium Proceedings; 371, p.351; 1995

Sol-gel strategies for controlled porosity ceramic materials: thin film and bulk
Brinker, CJ; Raman, NK; Sehgal, R; Prakash, SS; Delattre, L
Materials Research Society Symposium Proceedings; 368, p.329; 1995

Sol-gel strategies for amorphous inorganic membranes exhibiting molecular sieving characteristics
Brinker, CJ; Raman, NK; Delattre, L; Prakash, SS
Proceedings of ICIM3; p.63; 1995
