INSTRUCTOR: Nancee Ryan Mancel, M.A.

COURSE DESCRIPTION:

MATH 010L: Developmental Mathematics Lab will be conducted as a series of writing assignments to be done outside of class time. It is expected that students will spend approximately 50 minutes per week writing for their math lab.

Each week, students need to write 2 paragraphs of at least 4 sentences each. The first paragraph should be in the form of a journal and should discuss the following: What concepts did we cover this week, Did you encounter any difficulties with any of the concepts, and if so, which? How are you doing in this class? If you are having any problems, what are you doing to correct them?

The second paragraph will answer the question(s) of the week. The question(s) of the week will be given each Thursday.

Please put the assignment for each week on a separate page.

Do your writing assignments sometime between Thursday and the following Tuesday. Missing weeks cannot be made up. Put your writing assignments in your portfolio in the final (lab) section.

In order to pass the lab for this course, you must also pass the course. Please see me if you have problems or questions.
